MULTIPLICATION, (THREE TIMES TABLE)

LO: I can recall and use the 3 times table to multiply and divide.

What is the 3 times table?

The **3 times table** is a list of **multiples** of 3: numbers we get when we count in 3s. The digits of every multiple of 3 add up to a multiple of 3 (e.g. $27 \quad 2+7=9$).

Strategy: Skip-count in 3s on your fingers, or use a number line. Each jump adds 3.

Multiples of 3

●	$1 \times 3 = 3$	starting point
●	$2 \times 3 = 6$	double
●	$5 \times 3 = 15$	halfway to 10
●	$3 \times 3 = 10$	wrong
●	$3 \times 0 = 3$	any $\times 0 = 0$

Key idea

Multiplication is repeated addition. 3×4 means '4 groups of 3'. You can also think of it as '3 groups of 4' — the answer is the same.

$$\textcircled{3} + \textcircled{3} + \textcircled{3} + \textcircled{3} = \textcircled{3 \times 4 = 12}$$

Four groups of 3

MODELLED EXAMPLES

Study each example carefully before attempting the practice questions.

Example 1 – single multiplication

Calculate 7×3

7 groups of 3
 $3 + 3 + 3 + 3 \dots$
 $= 21$

= 21

Skip-count in 3s 7 times to reach 21.

Example 2 – missing factor

Solve: $__ \times 3 = 15$

How many 3s in 15?
 Count up: 3, 6, 9, ...
 $= 5$

= 5

Divide: $15 \div 3 = 5$.

Example 3 – division by sharing

Calculate $12 \div 3$

How many groups of 3 fit in 12?
 $3 \times __ = 12$
 $= 4$

= 4

Division is the inverse of multiplication.

Example 4 – word problem

A tricycle has **3 wheels**. How many wheels are on **9 tricycles**? Show your multiplication.

Identify what is being repeated
 Set up: count $\times 3$
 Compute and check

See solution

Always show your working clearly.

YOUR TURN – PRACTICE (deliberate practice)

1. Recall the 3 times table

Complete the calculation. Skip-count in 3s if you need to.

- a) $3 \times 3 = \underline{\quad}$
 b) $6 \times 3 = \underline{\quad}$
 c) $8 \times 3 = \underline{\quad}$
 d) $10 \times 3 = \underline{\quad}$

2. Missing factors

Find the missing number.

- a) $\underline{\quad} \times 3 = 12$
 b) $\underline{\quad} \times 3 = 21$
 c) $\underline{\quad} \times 3 = 27$
 d) $\underline{\quad} \times 3 = 33$

3. Dividing by 3

Use the 3 times table to divide. $3 \times \underline{\quad} = ?$

- a) $6 \div 3 = \underline{\quad}$
 b) $15 \div 3 = \underline{\quad}$
 c) $24 \div 3 = \underline{\quad}$
 d) $36 \div 3 = \underline{\quad}$

4. Two-step problems

Work out the answer step by step.

- a) $(2 \times 3) + (3 \times 3) = \underline{\quad}$
 b) $(5 \times 3) - (2 \times 3) = \underline{\quad}$
 c) $12 \div 3 + 6 = \underline{\quad}$
 d) $(3 \times 3) \times 2 = \underline{\quad}$

5. Mixed practice

Use what you know about the 3 times table.

- a) $3 \times 7 = \underline{\quad}$ b) $36 \div 3 = \underline{\quad}$ c) $\underline{\quad} \times 3 = 18$ d) $9 \div 3 = \underline{\quad}$ e) $27 \div 3 = \underline{\quad}$

COMMON MISCONCEPTIONS – SPOT THE MISTAKE

Each statement shows a student's answer. Tick () the ones that are correct. If it is wrong, write the correct answer.

a) $3 \times 0 = 3$ ☐

Correct answer:

Reason:

b) $3 \times 1 = 3$ ☐

Correct answer:

Reason:

c) $12 \div 3 = 4$ ☐

Correct answer:

Reason:

d) $3 \times 10 = 30$ (i.e. 30) ☐

Correct answer:

Reason:

e) $3 \times 7 = 22$ ☐

Correct answer:

Reason:

6. CHALLENGE – WORD PROBLEMS (apply your skills)

a) A tricycle has **3 wheels**. How many wheels are on **9 tricycles**? Show your multiplication.

Expression:

Simplified:

b) A florist sells roses in bunches of 3. There are **24 roses** in total. How many bunches can she make?

Expression:

Simplified:

TOP TIPS

Read the question carefully. Show all your working step by step.
 Check your answer makes sense.

CHECK YOUR WORK

Have I shown all my working clearly?

Did I check my answer using a different method?

Does my answer look reasonable?
